### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

### Example: [\(Simplified\)](#)

### Example: DFD Level 0 (Industry Standard)

## User Stories

Use the below template to list all the user stories for the product.

| User Type | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                | Acceptance Criteria                                                                    | Priority | Release  |
|-----------|-------------------------------|-------------------|--------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|----------|----------|
| Customer  | Registration                  | USN-1             | As a customer, I can register for the application by entering my full name, email, and password. | I can register and access my dashboard                                                 | High     | Sprint-1 |
| Customer  | Login                         | USN-2             | As a customer, I can log into the application by entering my email and password.                 | I can log in and view my dashboard                                                     | High     | Sprint-1 |
| Customer  | Complaint Management          | USN-3             | As a customer, I can raise a complaint describing my issue.                                      | I can submit a complaint and see it appear in my complaint list                        | High     | Sprint-2 |
| Customer  | Complaint Management          | USN-4             | As a customer, I can view the real-time status of my submitted complaints.                       | I can see status update (Open/In Progress/Resolved/Closed) without refreshing manually | High     | Sprint-2 |
| Customer  | Chat & Communication          | USN-5             | As a customer, I can chat in real time with the agent handling my complaint.                     | I can send and receive messages tied to my complaint                                   | High     | Sprint-3 |

| User Type                       | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                           | Acceptance Criteria                                                    | Priority | Release  |
|---------------------------------|-------------------------------|-------------------|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------|----------|----------|
| Customer                        | Feedback & Ratings            | USN-6             | As a customer, I can submit a rating and comments after my complaint is resolved or closed. | I can submit a 1–5 rating with comments once, visible on the complaint | Medium   | Sprint-4 |
| Customer                        | Notifications                 | USN-7             | As a customer, I receive a notification when my complaint's status changes.                 | A new notification appears when status is updated by an agent          | Medium   | Sprint-4 |
| Customer                        | Profile Management            | USN-8             | As a customer, I can view and update my profile details (name, phone, address).             | Changes are saved and reflected after page reload                      | Medium   | Sprint-5 |
| Customer Care Executive (Agent) | Complaint Management          | USN-9             | As an agent, I can view complaints assigned to me.                                          | I can see a list of complaints with customer details and status        | High     | Sprint-2 |
| Customer Care Executive (Agent) | Complaint Management          | USN-10            | As an agent, I can update the status of a complaint assigned to me.                         | Status change is saved and visible to the customer and admin           | High     | Sprint-2 |
| Customer Care Executive (Agent) | Escalation                    | USN-11            | As an agent, I can escalate a complaint to admin with a reason when I can't resolve it.     | Escalated complaint is flagged and visible to admin with my reason     | Medium   | Sprint-3 |
| Customer Care Executive (Agent) | Chat & Communication          | USN-12            | As an agent, I can view and reply to a customer's messages on a complaint.                  | Messages sync in real time between me and the customer                 | High     | Sprint-3 |

| User Type                       | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                          | Acceptance Criteria                                                                        | Priority | Release  |
|---------------------------------|-------------------------------|-------------------|------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|----------|----------|
| Customer Care Executive (Agent) | Chat & Communication          | USN-13            | As an agent, I can no longer send messages once a complaint is marked Closed.                              | Message input is disabled with a notice on Closed complaints                               | Low      | Sprint-3 |
| Customer Care Executive (Agent) | Feedback                      | USN-14            | As an agent, I can view customer feedback left on my closed complaints.                                    | Rating and comments are visible on the complaint once submitted                            | Low      | Sprint-4 |
| Customer Care Executive (Agent) | Customer History              | USN-15            | As an agent, I can view a customer's past complaint history for full context.                              | A history list of the customer's other complaints is shown on the complaint page           | Medium   | Sprint-5 |
| Administrator                   | Agent Management              | USN-16            | As an admin, I can create agent accounts to onboard support staff.                                         | New agent can log in with the credentials I create                                         | High     | Sprint-1 |
| Administrator                   | Complaint Management          | USN-17            | As an admin, I can assign an agent to a complaint.                                                         | Complaint shows the assigned agent and appears on their dashboard                          | High     | Sprint-2 |
| Administrator                   | Analytics & Reporting         | USN-18            | As an admin, I can view a dashboard of feedback analytics, including average rating and agent leaderboard. | Dashboard shows total feedback, average rating, rating distribution, and per-agent ranking | Low      | Sprint-4 |
| Administrator                   | Security & Access             | USN-19            | As an admin, I want the system to restrict API access via CORS to only the deployed frontend origin.       | Requests from unauthorized origins are rejected                                            | Low      | Sprint-5 |

| User Type     | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                 | Acceptance Criteria                                                 | Priority | Release  |
|---------------|-------------------------------|-------------------|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|----------|----------|
| Administrator | Security & Access             | USN-20            | As an admin, I want unauthenticated users redirected to the Home page instead of protected pages. | Direct navigation to a protected URL while logged out lands on Home | Low      | Sprint-5 |
