

Project Design Phase

Problem – Solution Fit Template

Date	07 July 2026
Project Name	CUSTOMER REGISTRY
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) Who is your customer? i.e. working parents of 0-5 y.o. kids CS Customers submitting support requests and complaints. Support agents handling and resolving customer requests. Admins overseeing operations, workflows, and team reporting. Define CS, fit into CC	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices. CC Customers: Limited time to explain the same issue repeatedly to different agents. Agents: Juggling multiple communication channels with no shared context. Internal: No visibility into internal support processes or complaint history.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to set the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking AS - Generic email support inboxes. - Spreadsheet-based ticket lists. - Phone-only support lines. - Basic CRM software with no dedicated support workflow or role-based access. Explore AS, differentiate
2. JOBS-TO-BE-DONE / PROBLEMS Which jobs to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides. J&P Customers: Need to get complaints resolved quickly and track the status of their requests. Agents: Need full customer history at a glance rather than searching through scattered notes. Admins: Need visibility into team workload, complaint escalation, and agent performance. Focus on J&P, tap into BE, understand RC	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? There is no centralized system to store customer data, track requests, and route them to the right agent automatically. As a result, information gets lost, responses are delayed, and the quality of service is inconsistent. RC	7. BEHAVIOUR What does your customer do to address the problem and get the job done? Customers call or email repeatedly to ask for status updates. Agents spend excess time searching old emails or physical notes for customer history. BE Focus on J&P, tap into BE, understand RC
3. TRIGGERS A product or service issue occurs for a customer. A customer experiences the same complaint again. A support request misses its resolution time (SLA breach). An agent is reassigned mid-case and needs context. TR 4. EMOTIONS: BEFORE / AFTER Before: Frustrated, anxious, and unheard (when facing the problem). After: Relieved, confident, in control, and valued (after using the solution). EM Identify strong TR & EM	10. YOUR SOLUTION A Customer Registry web application (built on the MERN stack) that centralizes customer profiles, request tracking, agent assignment, and admin reporting—providing real-time status updates and communication history for everyone involved. SL	8. CHANNELS OF BEHAVIOUR 8.1 ONLINE Email, social media direct messages (DMs), and in-app chat. 8.2 OFFLINE Phone calls. CH Extract online & offline CH of BE
